Deng Xiaoping

One problem was the challenge to party authority presented by the principles of activity and professional managerial autonomy.

Market socialism

It has primarily focused on increasing affordable housing, easing credit restrictions for mortgage and SMEs, lower taxes such as those on real estate sales and commodities, pumping more public investment into infrastructure development, such as the rail network, roads and ports. The government purchased grain when it was plentiful and inexpensive, shipping it to granaries for storage or to areas where grain was scarce. At the beginning of the Eastern Han, the land tax rate was one-tenth of the crop yield, but following the stabilization following Wang Mang's death, the rate was reduced to the original one-thirtieth in 30 AD.

Transition to a Market

Economic support for agriculture took several forms. Ninety-eight percent of the farm population was organized into communes between April and September 1958.

Transition to a Market

However, since the period of economic reform began in 1978, China has seen major improvements in average living standards and has experienced relative social stability. The classic example of this stop-go cycle of macroeconomic management is the 1984—86 episode.
