## Photography

In that same year, American photographer is credited with taking the earliest surviving photographic self-portrait.

## Photography

In 1891, introduced a process for making natural-color photographs based on the optical phenomenon of the of light waves. The methods used in analysing photographs for use in legal cases are collectively known as. Currently, available color films still employ a multi-layer emulsion and the same principles, most closely resembling Agfa's product.

## Photography

The birth of photography was then concerned with inventing means to capture and keep the image produced by the camera obscura.

## Photography

After a transition period centered around 1995—2005, color film was relegated to a niche market by inexpensive multi-megapixel digital cameras.
