## Chapter 13

Other challenges included lack of support from upper management, lack of public involvement training for staff, and lack of coordination among agencies. These challenges arise from specific issues within the agency, such as inadequate resources, or from the public, such as feelings of cynicism and distrust, lack of time, and lack of awareness. The ability to identify and to portray the information that the public requires in order to participate meaningfully.

### Public Participation Policies & Procedures

Community Participation aims at involving the citizens in municipal functions e.

## Chapter 13

Rather, public participation should be viewed as an opportunity to make a powerful decision — one that resolves issues to the broadest possible satisfaction and benefit of interested parties. This list should grow throughout the process as more stakeholders are identified and become interested. Moreover, consultations with affected interest groups were limited to those areas of deadlock only, and when these consultations did take place, they were carried out with very little time to plan or prepare.

### Evaluating Public Participation in Policy Making

The development process in a developing economy can acquire fuller meaning if the citizens not only associate themselves in planning development but also participate fully in development administration.
