Many of these questions directly reference literature. Consistency rating: 5 The text provides chapters on a general chemistry review of topics, analytical vocabulary, and statistical methods that provide a foundation consistently used throughout the text. Complicated technical language is often used to sound impressive but it is usually meaningless.

Analytical Chemistry

This course meets preprofessional requirements in certain areas of the College of Agricultural and Life Sciences.

Analytical Chemistry 2.1

Scientists constantly attempt to refute other scientists' works. Science is a process based on observations, conjectures, and assessments to provide better understanding of the natural phenomena of the world. I really like the idea of the chapter, as well as the content, but wish it was written to be chapter 8 instead of 14.

Chemistry < University of Florida

There are no photographs or mention of people. Content Accuracy rating: 5 No meaningful errors found. With that said, this textbook could be easier to navigate if the table of contents included links to subsections.

Scientific Equipment and Instruments

It was later revealed that the scientists were biased while conducting the experiment and that they were previously aware of what race each brain belonged to.
