The Spatial Distribution of Hepatitis C Virus Infections and Associated Determinants—An Application of a Geographically Weighted Poisson Regression for Evidence

Citation: Dodd CN, de Ridder M, Huang W-T, Weibel D, Giner-Soriano M, Perez-Vilar S, et al.

Risk perception regarding the COVID

The highest and lowest shares of curative expenditure to GDP are in the United States with 15. Health Econ Rev 2016; 6: 45. Caron CD, Ducharme F, Griffith J.

Impact of home care versus alternative locations of care on elder health outcomes: an overview of systematic reviews

Results Incidence rates of narcolepsy varied by age, continent, and period. Bynum JPW, Meara ER, Chang CH, Rhoads JM, Bronner KK. We examined the role of preventive and curative healthcare expenditure over the path of economic development and whether OECD countries could stimulate economic performance by appropriately allocating health expenditure.

Kin and birth order effects on male child mortality: three East Asian populations, 1716

The data were controlled for potential confounders of age and length of infertility. The ecological approach fails to detect any increased risk unless the time from onset to diagnosis is short and both coverage and the true relative risk are high. Long-term services and supports for older adults: a review of home and community-based services versus institutional care.
