The bronze age part of the settlement is dated about 3100-2900 BC to 1900 BC In 1841, some materials, including gold vessels from the site were sent to the Shah Mohammad Shah Qajar, and investigated Clement Augustus S. The archaeological site of Tureng Tepe is located nearby.

Shah Tepe

Similar stamp seals have been found in several sites of Bactria and Margiana such as Sapalli-depe, dated to the GKC period. Sherds of the red and grey ware from Tureng Tepe IIA 3 000 2 800 B.

Shah Tepe

From the unequivocal context of the floor of a single room of Period IVC we have recovered six proto-Elamite tablets and eighty-four tablet blanks an indication of their being written at Yahya identical in both shape and signs to the proto-Elamite tablets ascribed to Susa Cb and Siyalk IV. Delougaz University of California at Los Angeles as well as the recently undertaken surveys and sondages of H. Tablet blanks and inscribed tablets in situ at Tepe Yahya.

Description: Excavations at Haft Tepe, Iran

The base of the jars in Trench 7 is some 30 cm higher than in Trench 3, probably implying an open storage area with natural topography. The length of the mound is about 165 meters and breadth 135 meters. The bio-archaeological studies during the first season of excavation at Chalow show that agriculture and herding were important components of the economic activities of the site all through the occupational sequence.

Bonhams : ARNE (T.J.) Excavations at Shah Tepé, Iran

Mashkour would like to thank Dr Haeedeh Laleh and Mr Ahmad Aliyari, Director and deputy director of the Archaeometry Laboratory of the University of Tehran where the analysis of the archaeozoological remains were performed. This situation may have made the field notes and indexes and catalogs more confusing since some object cards and entries in the object catalog are marked with K. Records relating to the excavation at Tureng Tepe are limited, and consist of 2.

★ Tureng Tepe

While the was beginning a period of renewed power and influence in the 9th century, it is also at this time that the existence of the kingdom of, centered around , is first attested in the Neo-Assyrian annals and related literature.

Tureng Tepe, Iran expedition records, 1930

The top of the mound forms a rather even plateau about 7 — 7.
