Predator (1987)

Essentially, the hunting is all part of a bigger alien invasion plot. And even though the special effects can be a tad dated, 3D helps add a sense of realism to them to make up for the sub-par technique.

Predators 2: Everything We Know About The Cancelled Sequel

At one point in the film, Brown, who plays a government agent named Will Traeger, enters a mysterious structure, which just might be of alien origin. History The Yautja civilization has had an extensive history of influence on Earth which includes being worshiped by early Human cultures who viewed them as. Even as is, though, the armaments make it one of the most powerful suits seen yet in the movies, meaning that humans have a serious advantage over any returning hunters.
