Poverty status of a critical wetland area : Hakaluki Haor

It is comprised of about 20 plant species Table D.

Forestry And Environmental Science, SUST, Sylhet: Hakaluki Haor

Stakeholders of the projects, therefore, identified swamp forest restoration as one of the most important activities for sustainable development and management of the wetland ecosystem.

Barlekha Upazila

Calcutta's sewage has undergone natural purification in the complex of wetlands east of the city for at least 50 years; the facility also supports a rich fishery.

STATUS AND STRATEGIES FOR WETLAND MANAGMENT IN BANGLADESH

In the following figure 5. However, many of the beels have lost their capacity to provide shelter as mother fisheries, and hence are subjected to severe degradation due to- a Sand deposits from upstream rivers and canals, b Using complete dewatering technique for fishing activities and c Absence of aquatic plants to provide feed and shelter for parent fish. Just under half of the populations are engaged in other activities, many of them wetland-based, including manual laborers, boatmen, small traders and remittances from abroad.

① Hakaluki Haor is a marsh wetland ecosystem of north

We found all the genuses reported by Kanjilal that would be expected at the levels we studied homestead and below : Crataeva, Terminalia,

Lagerstroemia, *Ardisia*, *Trewia*, *Ficus*, *Clinogyne*, and so on. It is also clear from the project monitoring, evaluation, and planning work done by NERP so far that the actual as opposed to planned impacts of water resources projects are complex.
