### Chapter 22: Tanker Construction

The spread moored FPSO has 70 risers distributed longitudinally on both sides amidships. The largest tankers are unable to berth in port and must load and discharge at offshore platforms. So back pressure always to be monitored during operation of eductor.

### Standard Procedures for Tank Cleaning, Purging and Gas free Operation for Oil tankers

In the result, the ship has five cargo tanks of varying size, which allow small parcels of differing product grades to be transported.

### Tanker operation : Inspection Of Cargo Work Equipment And Machinery

Suitability This technology is suitable for use in areas where piped water service is not available or has been interrupted.

### Tank Farm Operations & Performance

In addition, as these liquids are loaded and offloaded in bulk quantities, there is a large transfer of high value that makes it imperative for tank farm operators to efficiently manage their inventory and maximize their return on investment. This reflects the fact that storage tanks are less likely to see such a wide variety of DMs as refinery vessels or pipework, which can come into contact with high temperatures, aggressive catalysts, sour H<sub>2</sub>S fluids and similar. Eductor require only a motive fluid or driving fluid for its operation, which allows it to use at any part of the ship including hazardous areas.
