## National Statement on Ethical Conduct in Human Research

And finally, the principle of justice focuses on the selection of research participants ensuring that some classes of people e. The IRBs are responsible to protect the rights, well-being, safety, and privacy of vulnerable subjects. The National Statement is developed jointly by the National Health and Medical Research Council, the Australian Research Council and Universities Australia.

## Guiding Principles for Ethical Research

The review body must be notified promptly of such suspension, and of any decisions following it see paragraphs 5. This chapter is not concerned with investigation conducted as part of law enforcement.

## National Statement on Ethical Conduct in Human Research

The custodian of the data may be the individual researcher or agency who collected the information, or an intermediary that manages data coming from a number of sources. Obviously, you need to respect copyrights and patents, together with other forms of intellectual property, and always acknowledge contributions to your research. Actually, it may even improve the retention rates as the physician will have enough time to explain the study details, purpose, and requirements for the potential subject.

## Human Subjects Research Overview

This chapter provides guidelines on the requirement for consent. Specific groups of participants for example, women or children should not be excluded from the research opportunities without a good scientific reason or a particular susceptibility to risk.
