## Health Beliefs and Perceptions: Implications for Type 2 Diabetes Self

Valid HbA1c blood spot assays were not returned from 668 HRS-DS respondents, yielding 1,233 valid HbA1c values. Leventhal H, Nerenz DR, Steele DJ. We also want to start focusing on a healthy eating pattern that is individualized for that person.

## Health Beliefs and Perceptions: Implications for Type 2 Diabetes Self

Khan LA, Khan SA 2000 Level of Knowledge and Self-Care in Diabetics in a Community Hospital in Najran.

## Every Person with Diabetes Needs Ongoing Self

Since its publication in 2001 there has been considerable media coverage of DM and the level of general education of the population has also increased substantially. Thus, persons who perceive that they have few years to live, often because of a competing health risk, have a lower incentive to invest in behaviors that would affect the course of the disease if their longevity prospects were greater Dow, Philipson, and Sala-I-Martin 1999. Does socio-demographic influence the diabetes self-management? However, the funder had no role in study design, data collection and analysis, decision to publish, or preparation of the manuscript.

## Illness beliefs and the sociocultural context of diabetes self

These categories are identified in the conceptual model as related factors that may influence self-management of type 2 diabetes among the middle-aged population of Pakistan. Health care providers may fail to abide by the DM care recommendations either by not providing particular services or failing to stress the importance of diabetes self-management to their patients Sloan et al.

## Illness beliefs and the sociocultural context of diabetes self

A meta-analytic review of the common-sense model of illness representations. As our study was outpatient hospital based, the results may not be truly representative of all DM patients in the UAE. In addition, our systematic literature review has demonstrated knowledge gaps, which can be

used to guide future research and the knowledge gained from future research will help to modify the current conceptual model.
