Bright argues that Tyconius was not illogical or incompetent in the work's composition as many critics have claimed but rather that he organized his material in a concentric pattern so that Rule Four, the center of the seven rules, is also the central development of his theory. She cites Tyconius's intense concern with evil in the church as the genesis of his interest in the apocalypse and subsequently the meaning of the scripture concerning it. This book adds to this worthwhile but extremely underserved area a unique focus on their missionary activities. Bright asserts that although Augustine was greatly influenced by the Liber Regularum, his philosophical differences caused him to misunderstand its meaning.

The racial component of his work makes it especially compelling in that he analyzes in nuanced fashion how the common African descent of both the missionaries and their target population simultaneously facilitated and complicated their interactions. Although this treatment insured the preservation of the work and its lasting fame, Augustine's summary became better known than the original.
