Rainforests and why they are important

This layer is made up of some shorter trees and shrubs, but mostly the trunks and branches of the canopy trees.

Biological Drawings WORKSHEET

Soils in the Northeast also contain many nutrients, but agriculture is limited there because few fields are irrigated. Presentations, Experiments, Questions, and Answers Seven PowerPoint Presentations to introduce the basic concepts for an understanding of the underlying principles of Biology. Among the larger mammals are armadillos and anteaters, which prey on ants and termites, whose nests may stand more than 6 feet 2 metres high.

Nsa Dada, PhD

This layer is the loudest layer with the animals making lots of noise. To further understand the complexity of life, listed below are the ten levels of biological organization in living organisms listed based on the hierarchy starting with the basic element.,

Biological Sciences

The trees found in this layer take huge advantages of the heights they are in. Answers to the 'in-text' questions which occur in and by D.

Biology Teaching & Learning Resources. Educational articles, drawings, experiments & PowerPoint presentations by D G Mackean

During the daytime, the canopy layer becomes the hottest part.
