This option sorts the directory by those bids, highest to lowest. It is also easy to create additional customers. The volume is divided into four sections: academic software - appropriate for use in psychology instruction; psychological testing software - for use in testing; other clinical software - for use in clinical practice other than testing ; and statistics and research software - for data analysis and presentation.

### **Practicing distance therapy, legally and ethically**

For local filesystems, DNLC entries normally expire only under pressure from other more recent entries. Ethical telepractice The ethics of telepsychology are in a similar state of flux, though there is a lot of good information available, says Jeffrey Barnett, PsyD, professor of psychology at Loyola University Maryland, who regularly teaches and writes about ethical issues in psychology.
