The cerebrum or cortex is the largest part of the human brain, associated with higher brain function such as thought and action. Neurology is a medical specialty dealing with disorders of the nervous system. Parkinsonian syndrome is a term that describes a group of chronic, progressive movement disorders resulting from loss or decline in the function of dopamine-producing brain cells.

Brain Disorders: Causes, Symptoms, and Diagnosis

We do not require documentation of all of the examples. Learn more about our commitment to. Dermatomyositis A connective-tissue disease that is characterized by inflammation of the muscles and the skin.

Neurological Disorders in Children

The signal may stimulate or inhibit the receiving cell, depending on the neurotransmitter and receptor involved.

Texas Institute For Neurological Disorders

What is epilepsy, and how do we evaluate it under? You need not be totally precluded from performing a function or activity to have a marked limitation, as long as the degree of limitation seriously limits your ability to independently initiate, sustain, and complete work-related physical activities. Fibromuscular Dysplasia FMD is an arterial disease of unknown etiology typically affecting the medium and large arteries of young to middle-aged women. When we evaluate your fatigue, we will consider the intensity, persistence, and effects of fatigue on your functioning.
