Southport, NC

Give particular attention to the landscape treatment of Ennis Avenue and the Council Avenue and Simpson Avenue entry points where planting, lighting and signage should convey a clear sense of arrival at the edge of a major urban centre. A public meeting was held on October 12th, 2010 to present the Draft Recommendations of Vision 2020 and receive comments. Specifically, feedback was sought on the character of the area, the built form size, shape and orientation of a building and land uses types of activity on a site or in a building.

Search for a planning report

Ensure that all new development is planned in accordance with the sustainability principles listed in Section 3. This should also be reflected in the urban design of the campuses with the more industrial architecture of the TAFE being set in landscaped grounds and the university campus integrated with the urban street grid of the adjoining Smart Villages. The western-most car park has not been constructed at this time and presents a possible opportunity to locate multiple residential apartments over a future car park and ride facility.

Planning

Crown descriptions can be searched in the same way property and parcel descriptions are in the search bar.

Metropolitan planning

Figure 13: Indicative Development Plan Extension of Goddard Street and Possible Relocation or Reconfiguration of the Rockingham Aquatic Centre While the extension of Goddard Street via Louise Street through to Council Avenue is a critical component of the recommended road network, the City recognises the need to explore and consider an alternative alignment to accommodate, if required, the retention of the Rockingham Aquatic Centre.
