Occurs almost always under natural conditions in wetlands.

### Map of Florida Cities

About the Plant Atlas Florida has over 4,700 species of native or naturalized plants in Florida, including over 4,300 species of vascular plants and over 400 species of bryophytes plants known only from cultivation are not included. In contrast to the vascular plants, the gametophyte haploid generation of bryophytes constitutes the larger plant form, while the small sporophyte diploid generation grows on or within the gametophyte and depends upon it for nutrition. The coastal plains generally consist of flat land, fronted by barrier islands, sandy beaches, coral reefs, and sandbars.

### Florida

These species may become ranked as Category I, but have not yet demonstrated disruption of natural Florida communities. The data shown here reflects known or documented cases. Someone posted on for the yesterday.

### Waltheria bahamensis

It is the shortest of the highest points in all other states. Average daily cases are the average number of new cases a day for the past seven days. Plant species that are not expected to be seen in wetlands.

### Florida

Total cases are the cumulative number of cases in any given area, including probable cases and cases confirmed by testing. Classification Division Class Sub Class Order MALVALES Family Genus Species Waltheria bahamensis Britton Citation WALTHERIA BAHAMENSIS Britton, Torreya 3: 105.
