## More Shall Be a Dull The Aesthetics of History in Antebellum America

The distinction between internalist and externalist theories of aesthetic experience is similar, though not identical, to the distinction between phenomenal and epistemic conceptions of aesthetic experience drawn by Gary Iseminger Iseminger 2003, 100, and Iseminger 2004, 27, 36. Hence the philosophical thesis, according to which the aesthetic properties a work actually has are those it is perceived as having when perceived as belonging to the category or categories it actually belongs to. Threads of movements such as classicism, romanticism, and naturalism, together with critical theory, were being redefined within a pattern that, inevitably, will grow more intricate and extensive as the field of study reaches out to the vernacular, cinematic, and oral, where previously it had focused on the canonical. Brazilian modernism is often cited as one of the first autochthonous? The dominant images of Brazil in films of the 1950s era and in some cases still to this day derive from the World War II-era Good Neighbor policy of the Franklin D. Roosevelt administration, through which the United States would engage in a foreign policy of aid, cultural exchange although this was unequal and non-intervention so as to secure greater Brazilian assistance in the war effort.

The gist of this argument is as follows: Empirical knowledge is possible because the faculty of judgment can bring together general concepts and particular sense-intuitions prepared for it in the imagination. His methods were adopted by Origen, who distinguished three levels of meaning in scripture: the literal, the moral, and the spiritual or mystical see De Principiis IV, i, 16, 18, 20.
