This monograph explores the relevant literature from institutional economics and entrepreneurial studies, focusing on the important link between the two. The volume includes essays on: the theoretical debate over socialism and, in particular, the contributions of Mises and Hayek, the origins of socialism in Russia, the institutionalist maturation of socialist practice and the de facto organizing principles of the mature Soviet-type economy, and the collapse of and failure to successfully reform the Soviet system Leeson , Economic Affairs, 2003, vol. A Semiotic Profile: Lubomír Doležel

As institutional economics is now revolutionizing policy making, the book can also serve as a guide to the pressing problems facing policy makers in mature and emergent countries alike. What the Eastern writers and artists learned and experienced in the stimulating atmosphere of Vienna gave them a new outlook, which they disseminated in their home countries through their journals and writings or by returning home and introducing the changes directly, often as teachers. Undoubtedly, one of the most important contributions of Lubomír Doležel to fictional worlds theory is the division between extensional and intensional structures of worlds.
