## How To Create a Safety Manual (For Small Businesses)

The Disaster Site Worker Outreach Training Program is a training program for Disaster Site Workers who provide skilled support services, e. Although some states, municipalities or others may require outreach training as a condition of employment, it is not an OSHA requirement. For the full program see the Train-the-Trainer Training Program - Complete Materials - Silica in Construction 2017 above.

## Outreach Training Program

OSHA urges authorized trainers to schedule registration, attendance, and completion of the relevant Trainer Update course well in advance of their trainer authorization expiration date. The Outreach Training Program provides basic safety and health information and education — it does not fulfill an employer's requirement to provide training under specific OSHA standards. Although some states, municipalities or others may require outreach training as a condition of employment, it is not an OSHA requirement.

Option 2: If You Want To Do It The Faster and Easier Way If you are like 97% of people in America, you don't have time to write a manual.

## Manuals & Guides

The OSHA Outreach Training Program for General Industry provides training for workers and employers on the recognition, avoidance, abatement, and prevention of safety and health hazards in workplaces in general industry. On average, headings range anywhere from 7 to 30,

depending on how detailed you want to be - or need to be.

### **How To Create a Safety Manual (For Small Businesses)**

For the full program see the Train-the-Trainer Training Program - Complete Materials - Silica in Construction 2017 above. It is the users' responsibility to ensure that the entities they represent or are employed by meet all applicable federal and state regulatory laws, standards, and regulations. It is important to note that this is a voluntary program and does not meet the training requirements for any OSHA standards.
