Climate Change

Sulfiya stayed poor because she lacked access to affordable credit. The original version of the Soviet Joint Venture Law, which went into effect in June 1987, limited foreign shares of a Soviet venture to 49 percent and required that Soviet citizens occupy the positions of chairman and general manager.

The Transformation Process: An Introduction

Child support money in Estonia, is unfortunately trolling people, as well as welfare support.

The Transformation Process: An Introduction

A child raised in a family that is ill prepared to raise them, is raised with risk and hardship.

Climate Change

A Theory of Change ToC is a strategic process to make assumptions about how change happens.

The making of microfinance

Vehicle emissions are a close second when it comes to the top causes of climate change. To make it to Europe, where life is very remarkably better you must: a take loans from all of your kin, promising to send back money b risk your life and freedom, to perhaps reach Libya c pay the mafia, hoping that they won't rob your money and enslave you d risk drowning in the Mediterranean and finally e accept that you won't find a legal job in Europe and must quickly disappear if you see an official. Gavrilescu, in , 2011 2.

Perestroika

Will we build a society where it's strongly advised to be born with a portfolio of automation company shares? Make the decision for the required mindset shift first, and then work on the behavioral shifts— organizational shifts will then follow.

Climate Change

Hornstein 2008 summarized the issue as it relates to IT programs when he stated, One of the most important and significant outcomes of organizational change efforts that are coupled with IT implementations is the demonstration of the power of community and community action.

The Transformation Process: An Introduction

Below are five key technological developments that show that technology is not only playing a critical role on the demand side, but one that is driving change in consumer behaviour at scale. It is merely unsustainable when very many people get fed up with their state simultaneously. So change agents need to get smarter about how to create change.
