# Computing numerical methods using Visual c++

John Wiley & Sons - BSCS BOOKS: Computing for Numerical Methods Using Visual C++

Description: -

-
Liturgics -- Catholic Church
Yosemite National Park (Calif.)
National parks and reserves -- California
Numerical analysis -- Data processing
Microsoft Visual C# .NETComputing numerical methods using Visual c++

-
Wiley series on parallel and distributed computingComputing numerical methods using Visual c++
Notes: Includes index.
This edition was published in 2007

Filesize: 35.92 MB

Technological Engineering College

Numerical methods discusses vital and crit- ical techniques in implementing algorithms for providing fast, reliable, and stable solutions to these problems. Chapter 8: Eigenvalues and Eigenvectors. Providing a bridge between a problem and its solution through visualization, this book covers the most talked about problems currently available.

COMPUTING FOR NUMERICAL METHODS USING VISUAL C

In an age of boundless research, there is a need for a programming language that can successfully bridge the communication gap between a problem and its computing elements through the use of visual-ization for engineers and members of varying disciplines, such as biologists, medical doctors, mathematicians, economists, and politicians.

COMPUTING FOR NUMERICAL METHODS USING VISUAL C

For general information on our other products and services or for technical support, please contact our Customer Care Department within the United States at 800 762-2974, outside the United States at 317 572-3993 or fax 317 572-4002. Numerical methods is a branch of numerical analysis that specially deals with the implementation of the methods for solving the problems.

Computing for Numerical Methods Using Visual C++ by Shaharuddin Salleh, Albert Y. Zomaya and Sakhinah A. Bakar

Computing for Numerical Methods Using Visual C++ [Book]

In other words, software packages do not really teach the mathematical concepts and principles in solving a problem. The same files should be compatible with Visual C++ version 6 and below and with Microsoft Visual C++. Chapter 3: Fundamental Mathematical Tools.

Numerical Methods Tutorial using C & MATLAB

Our third objective is to make numerical problems friendly and approachable. A typical problem in engineering for study- ing the effect of chemical spills in a lake may involve engineers, chemists, biologists, medical doctors, mathematicians, economists, urban planners, and politicians. Microsoft Foundation Classes is the trademark of Microsoft Corporation.
