Chapter 3. Learning Mac OS X Basics

Your application loads and initializes the dialog box, processes user input, and destroys the dialog box when the user finishes the task. Quickly selecting the layer's alpha Since 2. Press VO-Right Arrow key until you hear the view you want to use.

Using Dialog Boxes

If any of your menu items performs an action that is duplicated by another menu item or by a tool-bar button, then in addition to this section you should read. Since file extension names are not appended by Macintosh systems, you must find the executable file by searching for the file icon. .

Macintosh

To hide or show the toolbar and sidebar, click the button in the upper-right corner of the window.

Customizing Toolbars and Menus

Using Cancel would be ambiguous here, so Don't run is used instead.

Customizing Toolbars and Menus

Use normal text and a 16x16 pixel error icon, placing them directly next to the problem whenever possible. In its collapsed state, the dialog contains a filename field, a pop-up button for selecting an output location, a field for tagging the saved file, an optional file format pop-up button, an optional accessory view for displaying custom save options, a Save button, and a Cancel button. This sample shows how to achieve the functionality of COXTreeCtrl demonstrated in the downloadable Demo Browser.
