Recovery Strategy for the Rainbow Trout (Oncorhynchus mykiss) in Canada (Athabasca River populations)

Collections from streams in the upper Gila River Basin and San Francisco River Basin, along with genetic analyses, indicate that five lineages of Gila trout exist: Main Diamond Creek, South Diamond Creek, Whiskey Creek, Spruce Creek, and Iron Creek. Peterson also hopes to determine if brook trout were native above the barrier falls that block upstream passage by fish from Lake Superior.

Trout & Salmon Regulations

Taken together, we may have more hunters and anglers but ever fewer places to hunt and fish in a seemingly inexorable trend.

ALL ABOUT TROUT

These are lower priority populations that have limited conservation value for Athabasca Rainbow Trout at this time, but have high recreational value and may be managed to provide these benefits Alberta Athabasca Rainbow Trout Recovery Team 2014. Involve affected anglers in project development and implementation.

How Reducing Farm Runoff in PA Streams Benefits More Than Just Fishing

There is a reason why every other coastal state has safeguards in place to protect their shorelines against the abuse of commercial pogie fishing. Many STWs require artificial flies and lures with a single, barbless hook.
