Digital India: Technology to transform a connected nation

Filesize: 42.53 MB

Based on this Q2 2017 report by Akamai, the Philippines' average internet speed IPV4 was a lowly 5. .

Emerging Trends Archives

Global and local digital businesses have recognized the opportunity in India and are creating services tailored to its consumers and unique operating conditions. Legal arrangements can have important economic consequences.

Digital India: Technology to transform a connected nation

A political prisoner for seven years under the Burmese military government, she was released 2012 under a presidential amnesty. In June 2001, the Globe-Islacom Merger was completed.

Building Telecom Markets

. National oil companies from outside Africa, including China CNPC, CNOOC, Sinopec , Malaysia Petronas , and Russia Gazprom have also aggressively invested in the continent, linking broader infrastructure investments and government-to-government relationships with access to resources. Africa has diverse agro-ecological conditions, so countries need to adopt many different farming models to create an African green revolution.

Telecommunications in the Philippines

At the same time, private firms are using digital technologies to streamline operations by moving freight booking online, automating customer

service, installing tracking devices to monitor cargo movements, using real-time weather and traffic data to map efficient routes, and equipping trucks with internet-linked sensors to alert dispatchers when a vehicle needs servicing. In recent years, new kinds of competitors have entered and grown in Africa, once the domain of the large international oil companies.
